Missouri Weekly Hay Summary 02/14/19

Another week of weather extremes in the state, which pretty much seems to be the norm. One thing we know for certain is the days are getting longer and perhaps not soon enough, but spring will eventually come. Even though there is still plenty of feeding days left, there has been some new hay showing up in the market. It seems that some farmers feel they might have a bit extra and given the currently price levels have become more willing to part with some average to lower quality before new crop hay arrives and potential larger supplies cause prices to fall. The supply of hay light to moderate. Hay prices are steady. Hay demand is moderate to good. The Missouri Department of Agriculture has a hay directory available for both buyers and sellers. To be listed, or for a directory visit <http://mda.mo.gov/abd/haydirectory/> for listings of hay <http://agebb.missouri.edu/haylst/> (All prices f.o.b. and per ton unless specified and on most recent reported sales price listed as round bales based generally on 5x6 bales with weights of approximately 1200-1500 lbs).
